

Exquisite Heat® US Patent 6,402,043

Exquisite Heat indoor boiler reset provides Intelligent control for heating & cooling equipment for even comfort, reduced air pollution and 10-20% fuel savings.

Computer control allows HVAC systems to adjust system output to the real time heat/cool replacement needs for homes, buildings & Industry.

Folks enjoy efficiency and comfort never before imagined.

Our goal is to become part of the boiler temperature control for your products.

Rev 08-09

Saving on **energy and air pollution** in the coming years is a top priority for the nation. Combined with sound engineering and efficient operating systems Exquisite Heat can add 10-20% and more conservation of gas or oil, and increased comfort for building occupants.

Exquisite Heat is a unique patented process at a reasonable cost, for heating systems. We can help make your heating and cooling products run more smoothly, and more efficiently. Seeing is believing.

Reduced operating expense means less fuel, less air pollution, and more **even comfort** for all.

You can have factory training and testing right at your chosen site. Let us meet you in one of your factory boiler rooms to study your system needs. Call us and we will take you through our website.

Outdoor reset technology can not compare to the precision of Exquisite Heat. The sooner the better. You can have a competitive edge by being an early adopter.

Take a tour of our installations, to see for yourself. You will then appreciate the advantages.

Saving fuel, every hour of the day.

Reset controls will be required by 2012.

Take a look at the advantages of Real Time Indoor HVAC Reset for your product line.

Exquisite Heat® The most precise indoor reset available.

“What can I do to assure my customers the best control strategy ?”

Let computer technology reset your Heating Systems every minute more efficiently and more comfortably.

Exquisite Heat pays for itself through fuel savings in 2 years or less and **costs less** than outdoor reset technologies.

Exquisite Heat technology addresses distribution of BTU's to make structures **more comfortable** for occupants, with even and accurate thermal delivery.

It is exquisite because it adjusts systems precisely every minute of the day to provide the **exact replacement** of energy loss from homes or buildings, under constantly changing conditions.

Exquisite Heat is **compatible intelligent** for all HVAC, boilers, zone controls, and distribution systems.

You need to know as much as you can. Many try to mimic Exquisite Heat but you can have the real thing for your equipment.

Exquisite Heat technology operates with: **Steam, Hydronic, radiant, Condensing boilers, Hydro-air, single or multi-zone, Steam valves in central steam, Hot air furnaces, oil, propane, natural gas, geothermal, heat pumps, hydronic solar systems , big homes, buildings. Your customers will refer you to others.**

Exquisite Heat is an essential part of any efficient heating system. Most multifamily buildings need improvement for under and over heated areas. Even distribution of heat to apartments is the most common failure we address with Exquisite Heat technology.

Let us take your rep. for a tour of our buildings to see detailed benefits we offer in a time that demands better system operation. Exquisite Heat control removes comfort issues and reduces carbon emissions from buildings. Having good control for comfort & efficiency is as important as boiler replacement, insulation, window change outs and draft reduction. We are a part of your solution, and we want you to know all about it.

Find pictures of the many types of buildings we control for happy managers and happy residents at.

HVAC and Boiler Manufacturers can now have a unique ability to make new heating and cooling systems as efficient as possible. First and foremost is the need for accurate Comfort delivery. Then deliver that comfort **most efficiently.**

The advantage of thermostat analysis over outdoor temperature sensor analysis is the real time accuracy of the analysis against what is really going on **inside** the building..

Exquisite Heat puts comfort needs above boiler setback possibilities. Then we setback to achieve the efficiency available for precise BTU delivery. The advantages over outdoor reset are significant. Let us show you a personal tour of our website to understand the subtleties of this exciting new method. We would like to incorporate “Exqheat Inside” for your boiler temperature controls. These things take time, so let's get started today.
