

## **Exquisite Heat®**

US Patent 6,402,043

*Exquisite Heat indoor boiler reset provides Intelligent control for Heating & cooling equipment for even comfort , reduced air pollution and 10-20% fuel savings.*

*Computer control allows HVAC systems to adjust system output to the exact heat/cool replacement needs of homes & buildings .*

*Folks enjoy efficiency and comfort never before imagined.*

### **Saves Gas and Oil.**

*Controls Hot water ,Steam, HVAC, hot and cold Air.*

*Each system is customized to the exact conditions of each home or building .*

Saving on **energy and air pollution** in the coming years is a top priority for the nation. Combined with sound engineering and efficient operating systems Exquisite Heat can add 10-20% and more conservation of gas or oil, and increased comfort for building occupants.

**Exquisite Heat** is a unique patented process at a reasonable cost, for your customers heating systems. We can help make newer and older systems run more smoothly, and more efficiently. Seeing is believing.

Our one year money back, no questions guarantee program and 5 year equipment warranty, is second to none, and the savings over expense make this system a cash positive profit center for your budget for many years to come. Reduced operating expense means less fuel, less air pollution, and more **even comfort** for all occupants. It is a win-win for all.

You can have factory training right at your chosen site. If needed, we can provide you with one of our local factory approved installer contractors. Let us meet you in one of your boiler rooms to study your system needs. Call us and we will take you through our website.

Saving fuel, every hour of the day.

**Boiler reset controls will be required soon.**

**Isn't it time you took a serious look at the choices?!**

**Exquisite Heat® The most precise indoor reset available.**

The first decision is to ask: "What can I do now to save fuel?"

Let computer technology reset your Heating Systems every minute more efficiently and more comfortably.

Exquisite Heat pays for itself through fuel savings in 2 years or less and **costs less** than outdoor reset technologies. Exquisite Heat reduces dependence upon expensive fuels, and reduces chimney exhaust pollutants from the atmosphere.

Exquisite Heat technology makes structures **more comfortable** for occupants, with more even and more accurate thermal delivery.

It is exquisite because it adjusts systems precisely every minute of the day to provide the **exact replacement** of energy loss from homes or buildings, under constantly changing conditions.

Exquisite Heat is **compatible** with all new or old equipment, zone controls, and distribution systems.

Exquisite Heat technology operates with: **Steam, Hydronic, radiant, Condensing boilers, Hydro-air, single or multi-zone, Steam valves in central steam, Hot air furnaces, gas, oil, propane, natural gas, geothermal, heat pumps, hydronic solar systems , big homes, buildings. You name it. No need for major retrofit. Installs in 2-4 hours.**

**You can do this. Your customers will refer you to others.**

Exquisite Heat is an essential part of any efficient heating system. Most multifamily buildings need improvement for under and over heated areas. Even distribution of heat to apartments is the most common failure we address with Exquisite Heat technology.

Let us take you for a tour of our buildings to see detailed benefits we offer in a time that demands better system operation. Exquisite Heat control removes comfort issues and reduces carbon emissions from buildings. Having good control for efficiency is as important as boiler replacement, insulation, window change outs and draft reduction. We are a part of your solution, and we want you to know all about it.

Find the pictures of the many types of buildings we control for happy managers and happy residents at.

## HVAC Contractors and Plumbing Contractors

have a unique ability to make new and old heating and cooling systems as efficient as possible. First and foremost is the need for accurate Comfort delivery. Then we deliver that comfort **most efficiently**.

Anyone can turn off the heat. Our goal is to **deliver efficient comfort**. The advantage of thermostat analysis over outdoor temperature sensor analysis is the accuracy of the analysis against what is really going on **inside** the building..

Exquisite Heat puts comfort needs above boiler setback possibilities. Then we setback to achieve the efficiency available for precise BTU delivery.

**For new or existing heating and cooling, Exquisite Heat reset technology meets all of your reset needs.**
